Official email	hello@nexunity.live

1. Introduction

NxtUnity is an independent project building interactive games and web experiences that share one on-chain utility token. NXTU is designed as a common asset for gameplay, staking, and product features inside the NxtUnity ecosystem. NexUnity (www.nexunity.live) is the official project website for the NxtUnity (NXTU) Ethereum token.

This document provides transparent information about the token design, contract features, founder details, and current project status. It is intended for users, partners, and explorer reviewers.

2. Vision and Purpose

Many games and web products use separate points systems that do not transfer between experiences. NxtUnity aims to use one Ethereum utility token across its products so players and community members can carry value between NxtUnity websites, games, and staking systems.

The project is early-stage. The token contract is live on Ethereum Mainnet and its source code is verified on Etherscan ([verified source](#)). Product integrations are being developed and connected over time.

3. Token Overview

Project name	NxtUnity
Token name / symbol	NxtUnity / NXTU

Network	Ethereum Mainnet
Standard	ERC-20 with EIP-2612 Permit
Decimals	18
Total supply	1,000,000,000 NXTU (fixed)
Additional minting	Not possible after deployment
Sector	Gaming / Utility Token
Public sale / ICO / IEO	None

Official contract address

0xB5BF118fa1E727b25A9Fbad1d27e3463Bdd280Dd

The contract source code is verified on Etherscan as an Exact Match. Verify it directly here:

<https://etherscan.io/address/0xB5BF118fa1E727b25A9Fbad1d27e3463Bdd280Dd#code>

4. Token Distribution

At deployment, the full fixed supply of 1,000,000,000 NXTU was minted once to the founder treasury / owner wallet. There is no mint function for creating additional supply after deployment.

Owner / treasury wallet

0xECEa9ab8197CE4eCd45FfE4448c4f732cB8Ff380

Tokens may be distributed from this treasury over time for ecosystem use, including games, staking systems, community allocation, and operational needs. No public token sale was conducted.

5. Intended Utility

Games: NXTU is intended as a shared in-game utility token for NxtUnity game experiences and related events.

Staking: NXTU may be used in staking systems that distribute rewards from the project treasury.

Websites and apps: NXTU may be integrated into NxtUnity websites and applications for access, rewards, and community features.

Treasury distribution: Community giveaways and ecosystem programs are funded from the treasury wallet listed above.

6. Contract Features

Fixed supply: total supply is minted once at deployment with no further minting.

Burnable: holders may burn their own tokens.

Pausable: the owner may pause transfers as an emergency safeguard.

Permit (EIP-2612): supports signature-based approvals for integrations.

Ownable: ownership is held by the founder treasury wallet listed in this document.

OpenZeppelin: built using OpenZeppelin standard libraries.

7. Founder and Team

NxtUnity is currently a founder-led project. The public team member responsible for token deployment and project direction is:

Founder	Lehondro (also known as Hondro)
Role	Founder, project lead, and token contract owner
Official email	hello@nexunity.live
Owner wallet	0xECEa9ab8197CE4eCd45FfE4448c4f732cB8Ff380

On-chain ownership of the verified contract can be confirmed on Etherscan using the Read Contract interface: [Read Contract on Etherscan](#)

9. Disclaimer

This whitepaper is informational only. Nothing in this document is financial advice, an investment recommendation, or an offer to sell securities. NXTU is intended as a utility token for use within NxtUnity products.

Users should always verify the official contract address before interacting with any token claiming to be NXTU. Cryptocurrency involvement carries risk, including possible loss of funds.

Project information may be updated as the ecosystem develops. The latest official information is published on the NxtUnity website at <https://www.nexunity.live>.
